

Full-Stack Developer

COMPANY OVERVIEW

Imagine needing a medication to a curable disease only to find that your local pharmacy is out of stock. Even worse, you live in a rural area with no other pharmacies nearby.

Reliefwatch tracks inventory & diseases for health organizations in the developing world. We help reduce stock-outs and minimize expiring medication.

- Just graduated from Impact Engine (Chicago-based accelerator)
- Live product with recurring revenue

OUR STACK

Ruby on Rails, PostgreSQL, jQuery, CoffeeScript, HAML, and SASS all running on Heroku. Familiarity with these technologies is preferred but not required.

QUALIFICATIONS

- You write clean, reliable front & backend code
- Familiarity with testing (we use RSpec & Capybara)
- Ability to work well in teams or independently
- Strong written and oral communication skills
- Experience scaling web apps is a big plus
- Bonus: Familiarity with Twilio & PhoneGap (or similar technologies)

HOW TO APPLY
